

EasyMix LSR Metering & Mixing device

VOLUMETRIC METERING & MIXING SYSTEM FOR LIQUID SILICONE RUBBER
PROCESSING FOR 20L OR 200L DRUMS

CONSTANT FLOW TECHNOLOGY FOR A HIGHLY PRECISE AND CONSTANT
MIXING RATIO

EASYMIX

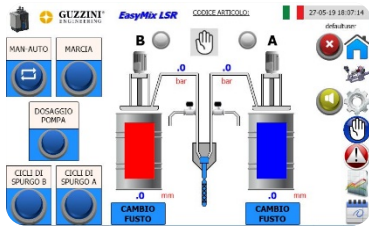

EASYMIX LSR METERING & MIXING DEVICE FEATURE GEAR VOLUMETRIC PUMPS WITH INVERTER THAT GUARANTEE A HIGHLY PRECISE AND CONSTANT MIXING RATIO WITHOUT PULSATION.

MAIN FEATURES

- Gear volumetric pumps with inverter
- Continuous flow of material without pulsation with a highly precise and constant mixing ratio
- Low energy consumption
- Simultaneous emptying of drums thanks to a compensating procedure with linear transducer (Max remaining material <1%)
- Disposable static mixer system – costs cut and ease replacement
- Up to 5 color or additive feeding lines
- Volumetric color dosing system for a precise and uniform distribution.
- Operating parameters can be set and checked through an easy to use 8 inches portable touch screen
- Quick change material drums system without air entrapment risk
- Extremely compact
